N.E.T.S. Nothing Else To Sync

brought to you by **FRLDRS.EXE**

DOWNLOAD NETS V2.0 here

What Is NETS?

NETS is an open-source File Synchronization software. NETS is developed using .NET framework and in C# language. This document covers the design and implementation details of NETS. It also includes suggestion on improvement of the program structure and features.

Information

- Current Version: 2.0
- Operation System: Windows XP/Windows Vista/Windows 7
- System Requirement: .NET framework 3.0+

What's New in Version 2.0

- Smart Sync: can be done via folders drop-and-drag besides right-click
- IVLE Sync: able to select which modules to download
- Faster sync for big files
- Polished and improved GUI
- Bugs fixed and enhancements
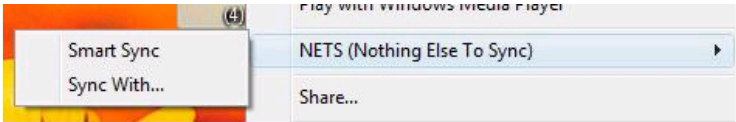

Features

Basic Synchronization

- Supports synchronizing content of two folders on the same computer Supports synchronizing folders on different computers through intermediate storage media (USB, Flash drive, Portable Hard disk, etc.)
- Supports one-way and two-way synchronization
- Supports file filter
- Supports folders Drag-And-Drop
- Supports saving sync information via profiles to execute the next time. Profile name is automatically suggested by the program and can be customized
- Supports executing multiple sync jobs
- Supports Delete To Recycle Bin/Delete Permanently options
- Supports logging actions during sync process for future review

BUT

NETS does not STOP there

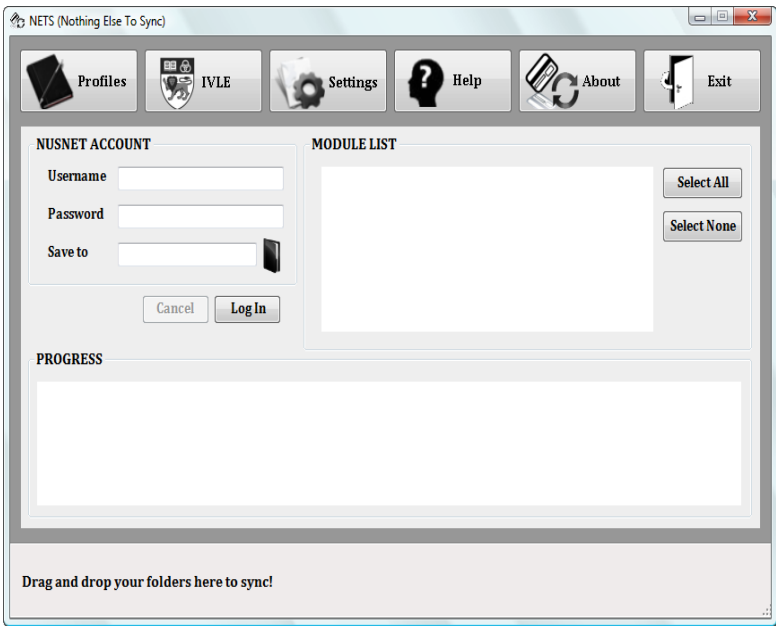

Right-Click Features

- **Smart Sync:** an intelligent and automatic synchronization feature which can dynamically detect the corresponding partnership of a chosen folder and synchronize them. It also supports multiple folder selection and sequentially handles each of them
- **Sync With…:** prompt users for destination folder to sync with the chosen folder. It does not support multiple folder selection
- mart Sync and Sync With… entries can be added/removed from right-click menu via customized settings

IVLE Synchronization

Tired of checking and downloading new files uploaded in a trillion different workbins?

Here we come

- A unique feature targeting at National University of Singapore (NUS) students
- Synchronizes Integrated Virtual Learning Environment (IVLE) Workbins with a local folder on student's PC
- Allow students to choose which workbins of which modules to sync

Simply login and click, and your folders on PC will be synchronized with the workbins. In other words, all the new files are downloaded to your PC.

*Just **THREE** steps and one **GAME**, all IVLE workbins are there, **READY** for your final*

So what are you waiting for ?
